ABOUT ME

13+ years of professional experience in Software development, Design Architecture and Engineering leadership. In my daily work, I pay attention to the high quality of the solutions provided; readable/clean code, clean architecture, performance and good monitoring are a standard driver for me. When making decisions, I try to be guided by data and product development.

I don't like reinventing the wheel, that's why I use TDD, DDD, DRY, SOLID, KISS and more in my daily work.

I like sharing knowledge. I am strongly goal-oriented. In the future, I would like to develop towards a Leader or an Architect.

GRZEGORZ ORCZYKOWSKI
